

Symposium 15

Evolutionary genetics and genomics in macro- and microalgae

Conveners

Myriam Valero, Mikael Le Gac

Key-note speakers

Susana Coelho Station Biologique de Roscoff, CNRS-Sorbonne Université, France

Anke Kremp, Leibniz Institute for Baltic Sea Research Warnemünde, Germany

Symposium description

The aim of this symposium is to bring together researchers with interests in genetics and genomics of algae. The symposium will focus on different questions related to the evolution of life cycles and life history traits, evolution of sex, mating systems and reproductive isolation but also on the importance of population structure and adaptation. Experimental, empirical and theoretical approaches are welcome.
