

Symposium 17

Symposium for the students The Special Sessions for Early Career phycologists

Conveners

Sunčica Bosak, Nikola Koletić

Description

The aim of these sessions is to give an opportunity to young scientists, Ph.D. and postdoc students, to interact with the responsible people (top speakers) on two important topics in their current/future scientific careers.

1.Meet the Editors

The session will feature the discussion on the Editorial system of most prominent scientific journals in the field of phycology. The aim is to use Editors as a resource for how to successfully publish your research including the do's and don't's of submissions, the explanation of the peer review process in different journals, what are the qualities of a good reviewer, and much more.

Top speakers:

Debashish Bhattacharya (Journal of Phycology)

Christine Maggs & Juliet Brodie (European Journal of Phycology)

Frederik Leliaert (Frontiers in Plant Science, Plant Systematics and Evolution)

2.Grants & Funding

The session will include the illustration and explanation of the mechanism of networks that provide funds for short-term research visits e.g. Transnational Access research projects within Assemble Plus as well as the presentation of several other funding possibilities. The Q&A session after short presentations will provide the possibility to interested participants to obtain further information.

Top speakers:

Wiebe Kooistra (ASSEMBLE Plus - Association of European Marine Biological Research Laboratories Expanded)

Jens Nejtgaard & Stela Berger (AQUACOSM – the EU-network connecting freshwater and marine large experimental research infrastructures)
